

***WHEN OCEANS THREATEN CITIES***  
**best audience of the year on France 5 - Science Grand Format,  
and a best-seller internationally**

The documentary 1x90' and 1x52' directed by Laurence Thiriat and produced by Tangerine Production in co-production with Composite Films for France 5 - Science Grand Format was the best audience of the season for this slot. Aired on November 10th, it gathered more than 1,1million viewers on prime-time.

Distributed by Terranoa, the film was pre-sold to Ushuaia TV (France) and EarthxTV in the USA. The film has also gathered some 15 international buyers: SRC Canada, RTBF, VRT, SFDRS, RAI 3, RSI, TG4, Odisea, RTV Slovenia, TV Slovak, SRTV Romania, Ceska TV, TVP (Poland), EBS Korea.

This film examines the future of three coastal megacities, New York, Rotterdam and Singapore, which are threatened by rising sea levels and deadly storms. Engineers, architects, geographers and biologists test and implement hybrid solutions in a race against time.

**Terranoa** was founded in 2000 in Paris and is one of the fastest growing distributors in high-end Factual content and part of the **Gedeon Media Group**. Its catalogue of over 2,000 hours of programmes focuses on Travel and Adventure, History and Science, Wildlife and Environment with a selective choice of topical Social and Current Affairs titles.
