

BRAIN FACTORY

A group of billionaires has joined forces with the greatest scientists in an effort to transfer the human brain to an avatar. Their goal is to transform Humans into digital beings and thereby free them from the curse of aging, and from death.

Science or Sciencefiction? Within the walls of laboratories, the creation of artificial humans has already begun.

AI VS HUMAN BRAIN: THE FINAL SHOWDOWN

Not a day goes by without the media mentioning the growing abilities of Artificial Intelligence. Some experts even believe its unbridled development could lead to the end of mankind. But what is Artificial Intelligence actually capable of? Where does the fantasy end and the reality begin? What will it bring about and what threats does it pose on our fate? Could it become as powerful as some say?

A survey of this other form of intelligence.
