DISCOVERY

THE MYSTERY OF THE GIANT SLOTHS CAVE

Poço Azul, a flooded cave in Chapada Diamantina, heart of Brazil, hid for thousands of years the bones of one of the biggest mammals to have already lived in the Americas.

In a mixture of adventure and science, this exciting film accompanies the expedition of paleontologists and cave divers in search of the fossils of the mysterious Giant Sloth.

An Eldorado of Paleontology which surprises all and unveils little by little its mysteries... giant armadillos, saber-toothed tigers, mastodons and other animals brought back to life thank to 3D CGI.

A dive into the past that will reveal incredible secrets of a fauna of extinct giants, and will be able to help to rewrite the Brazil from Pre-History
