

IF YOU KILL, CALL ME

Narco Lawyers Confidential

62' & 52'

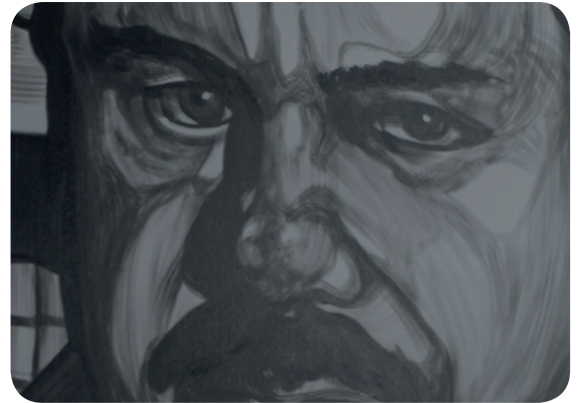

An exclusive investigation into the secretive world of narcolawyers, which delivers a striking immersion into an unforgiving reality.

They are the corner stone of sophisticated corporate structures set up to protect the Cartel's financial assets. While defending organized crime they blur the line between legal and illegal.

The film takes viewers behind closed doors and provides a non-binary view of this world, which thrives on extra-big money, corruption and Fear. We hear first-hand how seven of the most notorious legal figures see themselves and their clients as part of a global system sitting alongside the legal economy and blending with it at some point. International Experts from INTERPOL, UN advisors and local journalists also comment and help us understand the crucial and underestimated role such lawyers play in the system.

The film questions their integrity and explores the fine line which separates Crime and Legal activities when corruption prevails and when State Authority can't be trusted anymore. By shedding light on the Narco-Lawyers we move away from the fantasized Drug-Lord fictional icon.

You will never watch "narco fiction" the same way again.
