

TERRANOVA

A large, detailed shark is shown swimming in the ocean, its head and upper body visible above the water. The background shows a vast ocean with many smaller sharks swimming below. The sky is a mix of orange and blue, with birds flying in the distance. A large cactus is visible on the left side of the frame.

KINGS OF BAJA

A visual treat between desert and sea

4K

TERRANOVA

Captured entirely in 4K over a period of 4 years this film will transports viewers from Baja's punishing desert to the vibrant Sea of Cortez to extinct underwater volcanoes and kelp forests.

There are few places on earth more forbidding and beautiful than Baja Mexico. 800 miles long and 10 million years in the making, it is home to two major desert regions and offers one of the most diverse sea on the planet. Discover these complex ecosystems and explore the natural wonders found in the Sea of Cortez, from dive bombing pelicans, cormorants hunting underwater, Opalescent Squid mating, ...

Viewers will join the hunt with charismatic mega fauna such as sea lions, devil-rays, great white sharks, hammerheads, giant mantas, whale sharks, and gray whales.

From Emmy-nominated producer Michael Watchulonis (Micro Planet 3D, Fire Ants 3D) and Emmy award winning cinematographer Johnny Friday (Galapagos 3D, Great Migrations TV series).
