

THE AGE OF MAN

THE NEW DEAL

75' & 52'

TERRANOVA

Human activity and its impact on our planet has overcome the geological forces, opening a new era called Anthropocene (aka. The Age of man). Guided by climate change pioneers and thinkers of our time, speaking with opinion leaders and decision makers, this film provides a global approach to environmental issues and questions the scale of changes ahead as we revisit other examples in Human History when climate dictated the political Agenda.

With the interviews: Benjamin Barber, Rob Hopkins & Naomi Oreskes (USA), Dominique Bourg & Jean Baptiste Fressoz (France), ...
