## THE UNTOLD STORY OF MESOPOTAMIA

52'

HD

Shot in the Northern part of Iraqi Kurdistan, close to ISIS controlled areas, this film takes viewers into a true archeological Eldorado largely unknown and captured on film here for the first time.

The traces of hidden royal cities, extensive water management systems and 3,000 year-old reliefs and architecture are brought into light, using specially shot drone footage, secret satellite imagery, high-end 3D visualization and animated sequences.

These new findings saved from destruction, trigger a whole new understanding of the Ancient History and civilization thriving in the Middle East 4000 years ago under the watchful eye of Babylon and the Assyrian Empire...

A region known to be the cradle of civilization.
