

COSTA RICA

WILDLIFE UNDER THE RAINBOW

52' / 43'

4K

The tropical climate and contrasted topography of Costa Rica has fostered exceptional biodiversity, hosting wildlife from both North and South America. From the peaks of the volcanoes down to the Pacific and Caribbean shores, and amidst the dense Cloud forest, the country is home to the most remarkable mammals, beautiful birds, and astonishing reptiles...all in for a beauty contest!

Watch the colourful Quetzal and Toucan, listen to the Spider Monkey. As Iguanas battle for the last mango the frogs respond to the Scarlet Macaw wake up call.
