

# SAUDI ARABIA WOMENLESS KINGDOM

52'

It's one of the most secretive and radical countries in the world: the kingdom of Saudi Arabia. The Wahabi inspired regime bans videos or stills of its population in the name of religion. It's the last country in the world which bans women from voting or driving. How do these 15 million Saudi women live? What challenges do they face? What progress are they currently witnessing?

Two film makers travel to this unseen kingdom. One man and one woman. With their camera, they will catch the pulse of the gender issue in Saudi Arabia.
