IN THE FOOTSTEPS OF TINTIN

the adventures of Tintin in the land of reality...

HD | 5x52'

WHEN THE DRAWINGS CONFRONT THE ORIGINAL LANDSCAPES CROSSED BY THE REPORTER. A UNIQUE DOCUMENTARY SERIES FULL OF CREATIVITY AND HUMOUR

Tintin is no doubt one of the 20th century's greatest travellers, an intrepid and big-hearted adventurer who explored the whole world. Through this documentary series, we rediscover the world through Tintin's eyes.

From the forests of Peru to the mountain-tops of Nepal, from the arid Moroccan deserts to the mysterious atmosphere of Shanghai, it is an invitation to travel in the form of a road-movie, with Tintin as our travelling companion. We take the same means of transportation, we encounter the same difficulties, we see the same places, the same cast of characters... we relive the stories in the albums.

The series uses a subjective camera, with cut-in techniques to highlight the drawings from the books, enabling the viewers to fully experience Tintin's unique world. Thanks to archives, to Hergé's testimony in person and to the contribution of specialists, « In the Footsteps of Tintin » explains how the drawer took his inspiration from the events of his time, how he nurtured his drawings with numerous evocations and anecdotes on various cultures and civilizations.
